Summary

Data Analyst and Business Intelligence Analyst with 5+ years of experience delivering data-driven solutions across healthcare, gaming, and academic research environments. Skilled in Power BI, SQL, Python, ETL development, automation, and machine learning, with a strong focus on transforming complex datasets into actionable business insights.

Skills

Data Analytics & BI: Power BI (Advanced: Data Modeling, DAX, Dashboard Design), Tableau, Data Visualization & Storytelling, KPI Development

Programming & Data Analysis: Python (Pandas, NumPy, Web Scraping, Automation), Machine Learning (Applied / Basic)

Databases: SQL (Advanced Querying, Joins, Window Functions), SQL Server, PostgreSQL

Data Engineering & Automation: ETL Pipelines, API Integration, Data Automation, n8n (Workflow Automation), Report Automation

Product & Marketing Analytics: Google Analytics, GameAnalytics, Adjust, Metrix

Tools & Reporting: Excel (Advanced), Google Sheets, Google Slides

Professional Experience

Business Intelligence Analyst - Poura Darou Group, Tehran (Iran)

Jan 2025 - Present (1 yr 6 mos)

- Designed and developed 8+ interactive Power BI dashboards for sales, marketing, and operational performance monitoring.
- Created dashboard wireframes and UX concepts in PowerPoint before implementation, improving report usability and stakeholder adoption.
- Developed data models, KPIs, and interactive visualizations to support executive decision-making.
- Utilized SQL Server for data extraction, transformation, validation, and reporting processes.
- Engineered Python-based ETL pipelines to automate data ingestion from multiple sources and improve reporting efficiency.
- Implemented workflow automation using n8n, including scheduled SQL operations and real-time Telegram notifications.
- Automated quarterly business reporting by integrating Google Sheets and Google Slides, significantly reducing manual reporting effort.
- Collaborated with commercial and brand teams to provide actionable insights and performance analysis.

Data Analyst - Medrick Games FZE, Tehran (Iran)

Jul 2023 - Jan 2025 (1 yrs 7 mos)

- Developed and maintained BI dashboards using Power BI and Tableau to monitor key gaming KPIs, including DAU, retention, installs, ARPU, and revenue.
- Analyzed player behavior and marketing performance data from GameAnalytics, Adjust, and Metrix to identify growth opportunities.
- Automated data collection, processing, and reporting workflows using Python, reducing manual analysis efforts.
- Conducted ad-hoc analyses on LiveOps events, game updates, and user acquisition campaigns to support product and marketing strategies.
- Created executive-level reports and presentations, transforming complex datasets into actionable business insights.
- Collaborated with product, marketing, and leadership teams to drive data-informed decision-making.

Research Assistant - Yazd University, Yazd (Iran)

Feb 2022 - Mar 2023 (2 yrs 1 mos)

- Conducted research on recommendation systems and machine learning applications in sports analytics.
- Designed and evaluated predictive models for football player selection and team optimization.
- Performed data preprocessing, feature engineering, and model evaluation using Python.
- Developed a recommendation system as part of a Master's thesis focused on football player selection.

Android Developer - Avihang, Gorgan (Iran)

Jun 2016 - Oct 2017 (1 yr 5 mos)

- Developed Android applications using Java and Material Design principles.
- Collaborated on UI implementation, testing, and performance optimization.

Education

Yazd University, Yazd (Iran)

2020 - 2023

Computer Software Engineering, Master's degree

Golestan University, Golestan (Iran)

2015 - 2019

Computer Software Engineering, Bachelor's degree

Certificates

University of Colorado Boulder

Dec 2022

Python Packages for Data Science
